

Don't Rush to Crush Update

Don't Rush to Crush

Going to a new home!

Therapeutic Guidelines is proud to be partnering with Advanced Pharmacy Australia to deliver a new ***Don't Rush to Crush*** web app from **23 March 2026**. From this date, Therapeutic Guidelines will take over full delivery and management of ***Don't Rush to Crush***.

Will you continue using Australia's authoritative, continuously updated resource, researched, prepared and reviewed by leading multidisciplinary experts?

There is only one ***Don't Rush to Crush***, and its rigorous evidence base continues to be supported by:

- Robust editorial oversight responsive to feedback and medicines shortages
- Dispersion testing on Australian tablets and capsules with the University of Tasmania
- Australian-first oral liquid thickness testing with The University of Queensland

The point of care resource is set to become more accessible with a dedicated product app, extensive redesign and upgrades.

Working closely with Safer Care Victoria, our goal is to ensure a seamless experience for all users, with minimal disruption to access from 23 March 2026. There will be a dedicated DRTC quick link on the Clinicians Health Channel.
